

HALF-YEAR RESULTS 2023

27 September 2023

Key figures H1 2023: confirming the change in dimension of the group

Summary

• Activity of the first half 2023

2. Financial results H1 2023

3. Outlook & guidance

4. Q&A

ACTIVITY OF THE FIRST HALF 2023

139 M€ of orders in the first half 2023 +6% vs H1 2022

Navigation & Maritime robotics 108 M€ of orders / +€14 m vs H1 2022

Advanced technologies 31 M€ of orders / -€6 m vs H1 2022

Increase in order intake despite calendar delays in ongoing tenders, especially in the Middle-East

Extension of existing programs in maritime robotics

New orders for autonomous drones

5 Strong demand for navigation & positioning systems

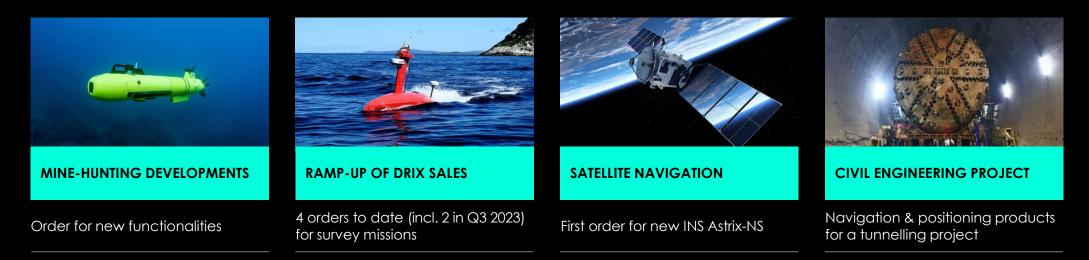

Strong demand for high-end optical components

Prioritizing internal needs from Navigation & Maritime robotics segment, impacting external order intake

Decrease in orders for **on-board equipment for aeronautics**, pending the new version of our distress beacons

Significant orders in established and new applications

SERVICE & MAINTENANCE

Recurring revenues servicing drones in operation worldwide

NAVIGATION FOR US COAST GUARDS

Modernization of USCG fleet

HIGH-TECH LASER SENSORS

Optic components for marine renewable energies

QUANTUM SENSORS

Providing PASQAL with quantum computer components

Ramping-up hydrographic survey with autonomous drones

>400

hydrography vessels worldwide that could be equipped with autonomous drones

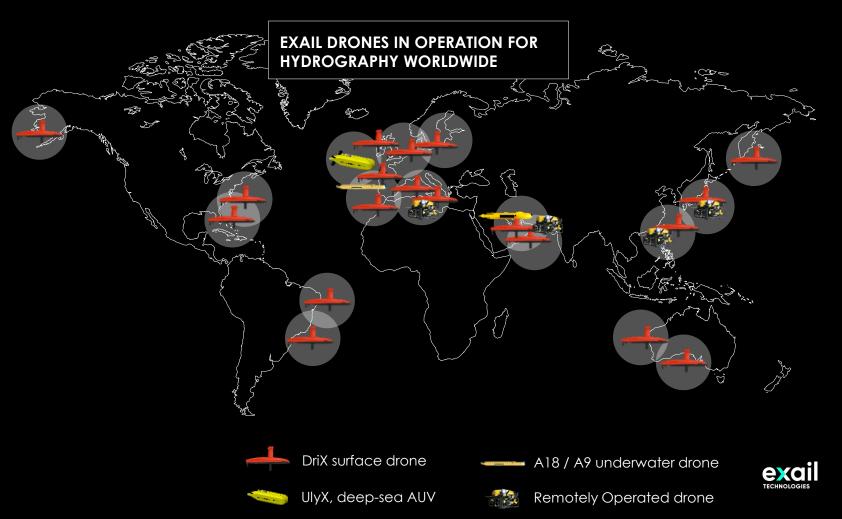

Multi-drone operations

deployed from one ship are starting

Exail is becoming a reference

setting performance standards with flagship clients

Case study: equipping the UK Navy with best-in-class navigation systems

Royal Navy chose Exail to upgrade part of their submarine fleet Several ships equipped with Inertial Navigation System Marins M7, one of the best performing products of Exail

ME

 Exail comforts its position as world leader for navigation systems in naval defense, thanks to its fiber optics technology and vertical intergation

venues in the first half 2023

line with expectations in the first on of the new group Exail mpacts with products in

stable level ements, incl. half non-cash item se of Prodways share distributed ts, and last acquisitions costs

ncial costs with higher leverage, h no cash impact

ngineering & Protection System h 2023

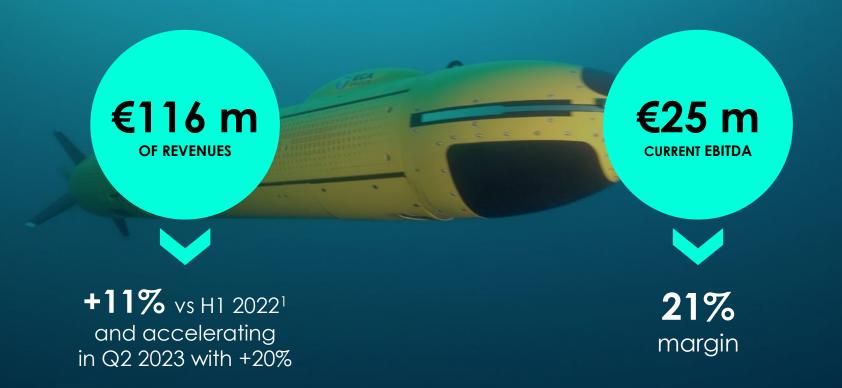

ne of +€26 m

¹ The figures for H1 2022 on a equivalent scope include the contribution of former iXblue as if the acquisition had taken place on January 1, 2022. Normativity adjustments have been applied: neutralization of acquisition costs, normalization of interest expense based on its structure at the acquisition date, neutralization of the negative impact of changes in the scope of consolidation on deferred tax assets related to the expected utilization of Exail Technologies' tax loss carryforwards. This P&L statement is purely indicative and does not comply with IFRS.

Navigation and maritime robotics: steady revenue growth

11

Advanced Technologies: strong demand driving revenues

€41 m OF REVENUES

+28% vs H1 2022¹ €7.4 m

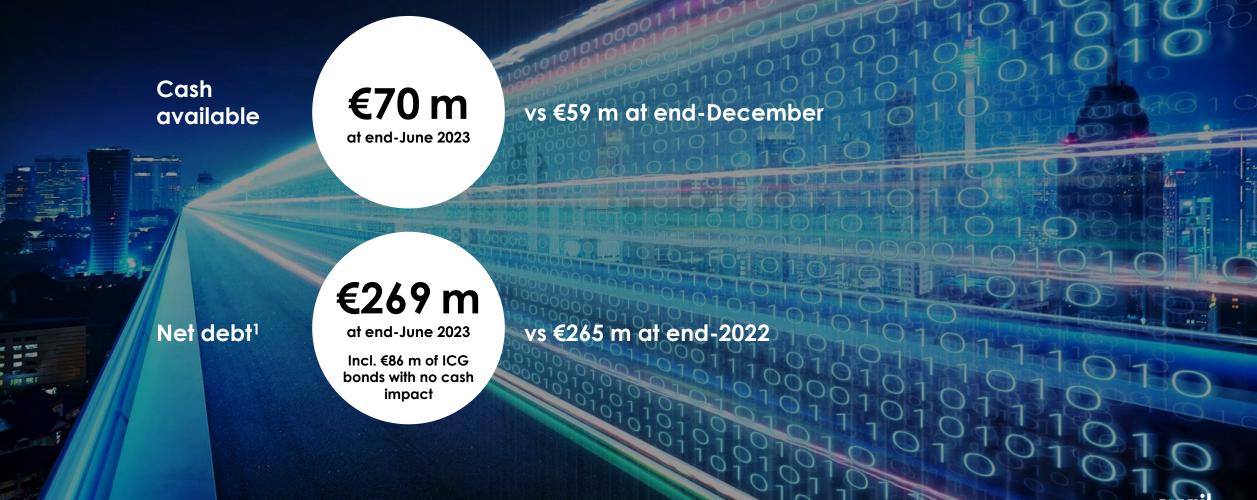

18% margin

Impacted by activities and products in development (autonomous drones for Logistics, quantum sensors, new version of distress beacon)

12

Net debt at end-June 2023

10

O

 \bigcirc

¹ Net debt including €7.6 million of treasury shares

Cash generation is a key priority

Capital of Exail Holding : Exail technologies increases its stake and opens the capital to managers

July 2023

Exail Technologies buys a 5% stake in Exail Holding from iXblue founder for €24,5 m on the basis of the same enterprise value as that negotiated early 2022

010

exai

September 2023

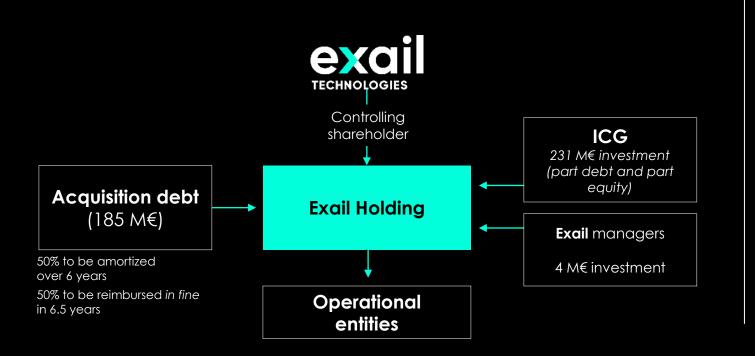

Around 50 managers of the group invest in Exail Hoilding for a total of around €2 million.

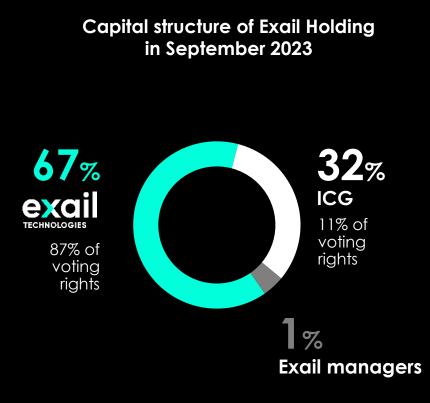

Exail Technologies enables management to be associated with the company's performance over the long term

Financial structure in September 2023

Financial structure

The details of the financial structure are available in the URD 2022

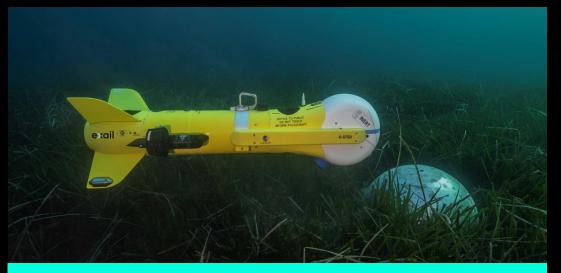

3. OUTLOOK & GUIDANCE

Large and well-oriented addressable markets

Defense applications ~€3.5 bn per year

KEY DRIVERS

Increase in the Global Defense Budget: +\$130 bn in 2022

Growing use of autonomous drones in operations

Mine-hunting systems: ~20 tenders of various size coming worldwide by 2030

Civil applications ~€4.5 bn per year

KEY DRIVERS

Development in Maritime renewable energies

Growing demand in harsh environments, like **space and deep sea** Development of cutting-edge technologies, like **quantum instruments**

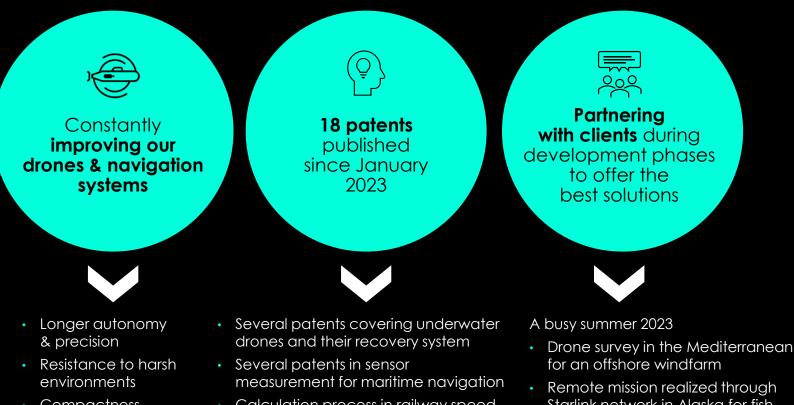

Focus on the market for Navigation & Positioning equipment

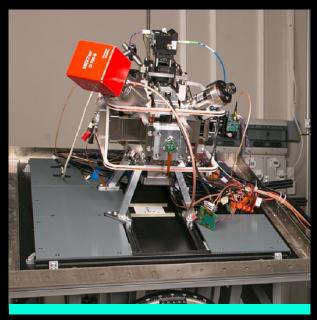

Research & development with our clients:

an engine for future growth

Ongoing R&D project to combine quantum sensors and Inertial Navigation systems

First experiments shows an accuracy 50 times better than current technologies

- Compactness
- Calculation process in railway speed
- And many more ongoing

- Remote mission realized through Starlink network in Alaska for fish stock assessment
